EDUCATION

B.Tech, Information Technology

Expected Apr 2027

Karpagam College of Engineering, Coimbatore, India

CGPA: 8.43 / 10.00

Relevant Coursework: Data Structures, Algorithms, Database Management Systems, OOPS, Operating Systems

SKILLS

Programming Languages

C, C++, Java

Web Technologies

React.js, Node.js, Express.js, HTML5, Tailwind CSS

Frameworks & Architecture

Spring Boot, Microservices, REST API

Databases & Tools

MongoDB, MySQL, Git, GitHub, Postman, Docker

PROJECT EXPERIENCE

Civic AI – AI-Powered Grievance Redressal Platform

[Live App](#)

Technologies: Generative AI (Gemini 1.5), FastAPI, React.js

May 2025 - July 2025

- Engineered an intelligent validation system using **Google Gemini 1.5 Flash**, automating the analysis of user uploads to filter invalid images (e.g., selfies) and classify civic issues in real-time.
- Streamlined the resolution process by implementing **LLM-driven** generation of formal complaint letters and integrating **OpenStreetMap** for precise geolocation tagging.
- Orchestrated a scalable full-stack architecture with **FastAPI** and **React**, successfully deploying the integrated application on **Hugging Face Spaces** for reliable public access.

HomeFix - Home Service Application

[Live App](#)

Technologies: React.js, Spring Boot, Docker, Microservices

Sep 2025 - Jan 2026

- Architected a microservices platform using **Spring Boot** and **Docker**, orchestrating independent Auth and Booking services to improve deployment efficiency by **40%**.
- Constructed a secure OTP verification flow via **Brevo**, validating user registration and securing **100%** of service completion transactions against fraud.
- Designed role-based **React** dashboards with dark mode support, facilitating real-time job tracking and reducing administrative oversight by **15 hours per month**.

Arab Spice - Food Ordering Application

[Live App](#)

Technologies: MongoDB, Express.js, React.js, Node.js (MERN)

Dec 2024 - March 2025

- Developed a responsive frontend using **React.js**, implementing **10+ reusable components** to standardize the UI and decrease page load time by **25%**.
- Formulated optimized MongoDB aggregation pipelines for menu search and filtering, cutting database query response time by **300ms**.
- Orchestrated the Admin Dashboard logic to handle CRUD operations, enabling the management of **50+ food items** with instant state updates.

ACHIEVEMENTS & CERTIFICATIONS

- Data Structures & Algorithms:** Solved **400+ problems** across LeetCode and GeeksforGeeks; Achieved a max LeetCode Contest Rating of **1523** (Top 35% globally).
- HackerRank:** Earned **5-Star Gold Badge in C++**; Certified Frontend Developer (React, JavaScript).
- React Certification:** Coursera (April 2025) – Mastered React Hooks, API integration (Axios), and State Management.
